

Talent has a place to grow

Intern (m/f) in Group IT Strategy and Architecture (GISEA)

Allianz Group is one of the largest and most renowned financial services providers in the world representing an international network of strong brands with first-class products. Above all, we strive for commitment to excellence in our daily business, in our relationships with customers, shareholders, employees and society. The Allianz Group serves more than 76 million customers in about 70 countries.

Allianz SE is the global headquarters of the Allianz Group. Our employees reflect the Group's geographic and functional diversity. Located in Munich Allianz SE can become the starting point of your international career.

Your new duties and responsibilities

You will be part of the GISEA team, that has the challenge to define the Group IT Strategy and Standards for platforms and define the processes to realize synergies as a strategic holding. The goal of GISEA is to develop an effective and efficient IT architecture and strategic IT vendor management to drive down costs and cycle times for agents and customers while supporting innovation.

You will support your GISEA colleagues and your main responsibilities will include:

- Plan and implement core IT projects e.g. Global Network, Mobile Device Strategy, Enterprise 2.0, Enterprise Search etc.)
- Collect and consolidate the various IT demands across the group
- Design and implement new IT solutions and services
- Write functional and technical requirement analyses and specifications
- Do technology market research and trend analysis
- Create management presentations and meeting
- Organize workshops and meetings with national and international participants

Required qualifications and experience

Qualifications

- Currently enrolled as a student of business / business informatics, informatics or others with preferably a strong technology focus (Min. Bachelor's Degree)
- Proficiency in MS Office Programs (PowerPoint, Word, Excel, Access)
- General understanding of IT management and IT process standards and frameworks (e.g. ITIL V2/V3, COBIT, ISO 20000, ISO 27000)
- Fluent in English and German (written and spoken)

Experience

- Solid understanding of technology and analytical mindset
- Previous project management experience is an advantage
- First experience in design and rollout of technology solutions
- Excellent communication skills
- Excellent team player and enjoy working in an international environment
- Sensitive for and capable to work in intercultural teams and in different environments

Start and Duration: As soon as possible, 3-6 months
